

Report no.  
17

## Summarization for meeting no : 17

Date of Report: 18 / 03 / 2023

### SUMMARY:

This meeting discussed the final stage of the discussion, which will take place over 48 hours and involve 250 teams. Each team will have 3 minutes to present their project and convince the judges that their solution is the best. There are 5 standards of evaluation, including the local problem, social challenges, solution, product, and possibility of sustaining the solution. The judges will be different in each stage of the evaluation and will use a scoring system. The presentation design and communication skills are also important factors. It is emphasized that participation must be organized as a delegation to two committees, not as one or two individuals. Overall, the focus is on finding practical solutions to problems in society.

### TASKS:

- There will be a final discussion in 48 hours with 250 teams in 12 rooms. - Each team will present their solution to a panel of 3-4 experts in 3 minutes. - Evaluation will be based on 5 standards: local problem, social challenges, practicality, product complexity, and sustainability. - The team must have a clear problem and solution, and a contingency plan. - The presentation design is important. - Each team should be organized as a delegation of 6, not one or two individuals. - The winning teams will be announced based on their scores, with two potential winners in each committee. - Tasks include explaining the evaluation criteria and presenting the project in a clear and convincing manner.

### EFFECTIVENESS:

1. Clearly explain the criteria for evaluation to ensure fairness for all teams. 2. Brief the teams on the schedule and structure of the final discussion. 3. The discussion will last for 48 hours and end at 4.80pm. 4. There are 12 rooms with 3-4 experts from different fields evaluating the criteria submitted. 5. Each team will have only 3 minutes to present their project. 6. The judges will evaluate based on five standards: local problem, societal challenge, practical application, feasibility, and sustainability. 7. The judges will be trained to use standardized criteria rather than personal opinion. 8. The winning teams may not necessarily be from each individual committee. 9. Focus on the stability and sustainability of the project. 10. The presentation design and effective communication are key for success.

## Thank you!
